### A Unique Barn.

A 12-sided concrete barn and round concrete silo are pictured and described in detail in the July Farm and Home. They were built by Menno S. Yoder, a progressive farmer of Lagrange county, Ind. The barn cost \$1,780 for material purchased and for hired labor. The labor of Mr. Yoder and his sons and the home-made timber used were worth \$1,500, or \$3,280 was the real cost of the barn.

Yoder's barn is 12-sided. It is 60 feet in diameter and each side is 16 feet long, making the barn 191 feet in outside circumference. The walls are solid concrete 30 feet high. They are reinforced with 118 rods of No. 9 wire. At the sides of doors and windows and above them the walls are further reinforced with old iron.

The doors at each end are 8x8 feet. Each door is in two sections and anything from a three-horse manure spreader to an automobile can pass through. There is a hydrant on the ground floor for watering cattle and waste water is tilted out. Nearly all woodwork around stalls and mangers is low down so it will not obstruct the light. There are two long feeding alleys, one on each side of the double central stable, and outside the feeding alleys the irregular-shaped space is used for box stalls and a calf pen. A litter carrier operates on 60 feet of track in the barn and a curve outside of the door, and seven feet of track in the barnyard.

There are 31 windows in the barn with 12x20-inch glass, four lights to each sash. The lower windows, 18 in number, have double-thick glass. All windows are protected inside and outside by heavy wire screens. The screen frames are held in place by wood screws, tightened up against the concrete.

The barn is 33 feet high from the ground to the opening in the roof, over which the ventilator cupola is built. Iron rims of old binder wheels were put in for the ventilator outlet and the upper end of the long rafters are bolted to these rims. A round hay rack 30 feet in diameter, built according to Mr. Yoder's own plans, has been placed under the roof and is fitted up with a new hay-carrying outfit that hoists the hay to any height and runs to either side without any track stop and without any change of ropes.
